PART-B: PROPOSED RESEARCH PROJECT DETAILS

1	Title of the Project	YIELD DRIVE									
2	Area of Specialization	ANDROID									
3	Project type	Basic Research/Applied Research/Developmental/Demonstration/Others									
4	Tentative time period	From(Date)		24-08-2022		To(Date)		24-02-2023		Max: 6 months	
5	Brief Introduction(Attach a separate sheet if required)										
	Over 70 percent of the rural households take up agriculture as their source of income. Post-harvest management is one of the phases of farming where a farmer spends more money before the yield is sold. This phase mainly includes transportation and storage of the yield.										
6	Significance of the Study (Its potential contribution to knowledge in the field of social relevance)										
	Every farmer needs to hire his own vehicle for transportation irrespective of the quantity of the yield produced. When a farmer needs to hire a vehicle, its pricing depends on the various factors like geographic location of farm.										
7	Research Objectives(Maximum of 2-3 Objectives in Bullet Form Only)										
	a. The main objective of this project is to develop an android app for pooling the transport of harvested crop.										
	b. By transportation pooling, the average cost of transportation spent by farmer on the yield can be significantly reduced, leading to increase in the profits.										
	c. Develop an android app for pooling the transport of harvested crop										
8	Proposed Methodology (Attach a separate sheet if required)										
	1) Most farmers give more priority to transportation as the selling price of the crop depends on the condition of the crop.										
	2) In this mobile application, more than one farmer can make use of a single transportation vehicle at the same time.										
9	Budget estimate for the project		Rs. 140000								
	S. No.	Items							Amount(Rs)		
	A	Minor Equipment/Software/Research Literature							84000		
	B	Consumables(Do not exceed 20% of the total amount)							28000
