RESEARCH METHODOLOGY

II-MBA-III-Sem. Subject Code: 18MBPCC2102

Course Objectives:

- 1. The need, types and process of research carried out in various fields.
- 2. The difference between qualitative and quantitative research and also testing the validity of research design.
- 3. Collection of data and selection of a sample for the analysis.
- 4. Data classification, coding and presentation of data using tables, graphs and diagrams.
- 5. Measurement of scaling techniques, errors in measurement and difference between comparative and non-comparative scaling techniques.
- 6. Reporting writing skills, guidelines to be followed in case of hypothesis formulation, data collection and interpretation.

Course Outcomes:

- 1. To apply the principles of research methodology for the research design for mini and major projects.
- 2. To test the validity and reliability of the model to be tested under the study.
- 3. To choose the appropriate sample with a suitable scale of measurement.
- 4. To select appropriate data sources- primary and secondary.
- 5. To analyse the data statistically and draw inferences.
- 6. To use of Excel and SPSS in Project Report.

Unit-I: Research Methodology

Overview of Research methodology-Research problems, Types of Research, Research process-Ethics in business research-limitations of social science research. Observation studies and research.

Unit-II: Design of Business research

Research design an overview: Qualitative research Vs Quantitative Research, Types of research design, Validity of research design, Types of designs

Unit-III: Data Collection Methods & Tools

Part A:

Primary Data, Secondary Data, designing questionnaire and Schedule of questions, relevant cases and exercises

Part B:

Sampling methods: Random, Non-Random Techniques, Tabulation, interpretation and analysis of data.

Unit-IV: Measurement of scaling Techniques

Introduction objectives Qualitative research Vs Quantitative measures, classification /types of measures characteristics/goodness of instruments/measurement of scales. Errors in measurement. Types of scales Techniques comparative and non-comparative scaling techniques guidelines for deciding scales.

RESEARCH METHODOLOGY AND IPR

I-M.TechI-Sem.	
Course Code: 20MC101	

L T P C 2 0 0 2

Course Outcomes: At the end of this course, students will be able to

- 1. formulate research problem
- 2. analyze research related information
- 3. follow research ethics
- 4. perceive nature of IPR and its development
- 5. Outline the patent rights

UNIT –I:

Meaning of research problem, Sources of research problem, Criteria Characteristics of a good research problem, Errors in selecting a research problem, Scope and objectives of research problem. Approaches of investigation of solutions for research problem, data collection, analysis, interpretation, Necessary instrumentations

UNIT - II:

Effective literature studies approaches, analysis Plagiarism, Research ethics.

UNIT - III:

Effective technical writing, how to write report, Paper Developing a Research Proposal, Format of research proposal, a presentation and assessment by a review committee

UNIT - IV:

Nature of Intellectual Property: Patents, Designs, Trade and Copyright. Process of Patenting and Development: technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT.

UNIT - V:

Patent Rights: Scope of Patent Rights. Licensing and transfer of technology. Patent information and databases. Geographical Indications.

New Developments in IPR: Administration of Patent System. New developments in IPR; IPR of Biological Systems, Computer Software etc. Traditional knowledge Case Studies, IPR and IITs.

Date: 13-08-2022

Minutes of Meeting- R&D - Ethics and research commitee

Agenda of the Meeting- To audit the publications of the past year and suggest changes in the plan

The meeting began with the addresses by Principal and Dean, R&D where they praised the publication efforts of last year and suggested improvements for the upcoming years. It was decided that the following tasks should be performed to improve the research framework of our Institution:

- 1. To prepare a brief report of the publications made within the past one year and to highlight the research activities.
- 2. It was advised to use a standard plagiarism tool before paper submission to avoid rejection on the grounds of high plagiarism.
- 3. The faculty members supervising PhD students were advised to bring best practices to higher education.
- 4. Higher authorities appreciated students' publications and advised to ensure that all postgraduate students get at least one paper published in any Scopus-indexed journal.

Dean R&D Dr. Vijender Kumar Solanki

Principal Ethics & Research Committee Chairperson
